SUMMARY

Software Engineer with expertise in full-stack development, microservices, and cloud infrastructure. Proven track record in optimizing system performance, reducing costs, and enhancing user engagement. Skilled in Python, React, Django, Kubernetes, and AWS, with experience in leading CI/CD improvements and implementing data-driven solutions.

EDUCATION

Indiana University - Bloomington

Master of Science in Computer Science, **CGPA: 3.7/4**

Coursework: Enterprise Software Platforms, Machine Learning, Cloud Technologies, Computer Networks

Aug 2022 - May 2024

Bloomington, Indiana

JSS Science and Technology University

Bachelor of Engineering in Computer Science, **CGPA: 8.9/10**

Coursework: Data Structures, Algorithms, Operating Systems, System Design

Jun 2016 - May 2020

Mysore, India

TECHNICAL SKILLS

Programming: C, C++, Python, Java, C#, Javascript, Shell Scripting, Ruby, HTML, CSS
Technologies: Springboot, Maven, Gradle, React, Node.js, .Net Core, Flask, Django, MySQL, MongoDB
DevOps: Git, Jenkins, Docker, Kubernetes, SonarQube, Terraform, Ansible, IaC, JFrog
AWS: EC2, Lambda, S3, RDS, DynamoDB, VPC, CloudFront, CloudWatch, IAM, EKS, ECS

WORK EXPERIENCE

Hoosier Community Network | Software Engineer (Consultant)

Skills: SpringBoot, React, Django, SQL, Redis, Flask, PowerBI, AWS (RDS, Aurora PostgreSQL)

June 2024 - Present

Bloomington, Indiana

- Architected and enhanced RESTful API endpoints for NIBRS crime data integration, lowering data retrieval latency by 35% and ensuring rapid access.
- Designed and integrated PowerBI dashboards to visualize crime trends, embedding them within web pages, which led to a 25% increase in user engagement and improved analytics.
- Orchestrated full-stack web development with React, Django, Flask, and Spring, optimizing SQL and Redis caching mechanisms to reduce server load by 40% and deliver consistent, high-speed data access.

IU School of Education | Research Assistant

Skills: NumPy, scikit-learn, Unity 3D, C#, C++, Pyannote, Whisper, Python

Sept 2023 - Aug 2024

Bloomington, Indiana

- Constructed a machine learning model using NumPy and scikit-learn for predictive analytics on 6,571 features, achieving a Mean Squared Error (MSE) of 19.05. Optimized decision-making processes by 15%.
- Built and launched an AR application using Unity 3D, ARCore, ARKit, and C#, successfully deployed in 3 schools, benefiting over 2,000 students, this initiative increased STEM engagement by 30%.
- Integrated a speech-to-text system utilizing Pyannote and Whisper for audio diarization, speaker identification, and sensitive data masking. Enhanced system's efficiency in handling data while ensuring privacy and compliance.

Harman International (SAMSUNG) | Software Engineer

Skills: Jenkins, Terraform, Prometheus, Docker, Kubernetes, SonarQube, Java, Bash, Python, JFrog, AWS

Sept 2020 - Jul 2022

Bangalore, India

- Engineered and optimized microservices for Audi and Porsche's next-gen infotainment systems using Docker and Kubernetes, boosting system uptime to 99.9% and cutting infrastructure costs by 20%, saving \$200K annually.
- Automated code quality and testing processes with SonarQube, Python, and Bash, slashing production defects by 25% and averting \$100K in potential downtime costs.
- Led CI/CD pipeline enhancements using Jenkins and JFrog Artifactory for build image storage, reducing deployment times by 30% and delivering seamless updates to over 10 million users, significantly enhancing customer satisfaction.
- Streamlined cloud infrastructure management with AWS, Terraform, and Kubernetes, achieving a 15% reduction in cloud expenses and driving a 10% decrease in overall operational costs.
- Implemented robust monitoring solutions with Prometheus and Grafana, reducing system downtime by 35%, safeguarding \$50K in annual revenue from potential outages.

PROJECTS

Cloud Monitor 📄 | Python, Docker, Kubernetes, ECS, EKS, Prometheus, Nagios

- Deployed app for CPU utilization, managing Docker containers in ECR and deploying on Amazon EKS using boto3.
- Implemented scaling techniques with HPA, load balancing, and monitored using Prometheus and Nagios.

Logistics website for shipment tracking 📄 | ReactJS, Flask, MySQL, Python, RESTful API, GCP

- Developed a platform for carrier price comparisons integrated FedEx and UPS APIs for shipment tracking.
- Implemented 2-factor authentication for data security and deployed on GCP for scalability and high availability.
